# Welcome to HARO

Our family business has a tradition in wood processing in Rosenheim, Bavaria, that goes back 150 years. With our love for natural wood and our high quality standards combined with modern design, we have evolved into Germany's leading flooring manufacturer.

Thinking in generations with a long-term orientation is the foundation of our daily activities – and this is what is at the heart of our products. The development and manufacturing of sustainable products are just as natural for us as a high degree of innovation and modern design. This applies to our diverse parquet floor range as well as to our laminate floors and design floors, which are free from PVC and plasticisers. We offer just the right floor for any requirement.

We are delighted to inspire you with our passion for naturally beautiful flooring – enjoy choosing your new floor!

With kind regards

Peter Hamberger

DISANO Project

# Natural beauty is not a matter of chance

HARO stands for natural beauty. As Germany's leading parquet manufacturer, over the decades we have learned to understand what makes a truly beautiful floor. We draw inspiration from this knowledge every day and develop design floors that look almost like real wood.

# Sustainable quality 'Made in Germany'

For us as a family business, responsibility means thinking ahead and doing things in a considered and sustainable way. This applies first and foremost to our employees, many of whom spend their entire working lives at HARO. And it goes without saying that the respect and appreciation of each employee is close to our heart.

Responsibility also means that we use all resources carefully. For instance, we only use wood from our own and certified forestry. This ensures that the amount of wood taken from the forests never exceeds the amount that can grow back again. And thanks to our biomass

power plants and our hydroelectric power plant that uses the power of the Sims river, we are self-sufficient in energy – in addition to our production, we can even supply 8000 households with electricity.

Integral parts of our company's philosophy are also our commitment to Rosenheim as our headquarters and the fact that our products are 'Made in Germany'. It is here that we cultivate and advance our unique expertise that has made us a leading and highly respected supplier on the world market. And this is the foundation on which we are building the future.

## Values speak louder than words

Values are more than just words:  
They shape our thoughts and actions – every single day.

### Committed to sustainability

The more than 150-year history of our family business is characterised by sustainable thinking and action. We are aware of our responsibility and embrace it with enthusiasm and commitment – for society, for the environment, for people.

### Natural and healthy living

Not only are HARO floors beautiful to look at and to touch, they are also free from any harmful substances. For this, HARO was awarded the 'Blue Angel' quality label. This means that you can rest assured that our floors contribute to a high standard of healthy living and a pleasant ambience in the home.

### Guaranteed high quality

We know what it takes to produce naturally beautiful, high-quality floors. We put this knowledge into practice with great care – in every single floorboard, right down to the last detail. This is something we are proud of, and we prove it with our premium quality products.

### Made with passion

HARO is passion for natural beauty. We love processing and refining natural materials. Every single day, we use all our expertise and experience to ensure that you can feel the perfection of nature in our floors.

### Made in Germany

As Germany's leading parquet manufacturer, we combine traditional craftsmanship with new technology in Rosenheim. This makes it possible for us to produce floor coverings of the highest quality. For more comfort when it comes to installation and maintenance, and for long-lasting pleasure in living and working.

# Contributes to a healthy living environment, 100% free from PVC and plasticisers

In recent years, a new type of flooring has become established: 'design floors'. This term usually refers to floors that are made of plastic. But our DISANO Design Floors are in a class of their own. Unlike most other plastic floors, they do not contain any substances that are hazardous to health, such as PVC, plasticisers and phthalates. Or to put it differently: they help create a healthy living environment. That is why DISANO is certified with the Eco Label and has also been awarded the Blue Angel, the certificate for products that are free from harmful substances. In addition, the label 'Made in Germany' guarantees that our top-quality floors are exclusively produced in Germany under the best conditions.

online now!*

# DISANO Simple and easy

The following graphics identify our DISANO products that are designated for private application areas. They provide a quick overview of how the floors differ from each other and make choosing the right floor child's play.

The stars stand for the general quality class of the floor within the DISANO range.

## Price

The price scale shows the price category of the floor within the DISANO range.

## Features

The scale of features indicates how strongly the features of the floor are pronounced.

The criteria are:

- Moisture protection
- Warmth underfoot
- Comfort underfoot
- Easy installation
- Durability
- Scratch resistance

# Superior in every way

Unlike PVC floors that contain plasticisers, DISANO floors are not only better when it comes to creating a healthy living environment, but also in terms of technical advantages and usage properties.

## Colour changes

The colours of vinyl floors can change significantly when exposed to sunlight. DISANO, on the other hand, keeps its colour throughout its entire lifetime.

## Embrittling

As the plasticisers contained in vinyl floors lose their effect over time, the floor's surface can become hard and brittle. DISANO by HARO remains permanently soft and elastic.

## Dimensional stability

While vinyl floors react to heat by bending, DISANO by HARO remains amazingly even for years thanks to the rigid coreboard.

## Disposal

Due to the substances in vinyl floors, they must not be disposed of in household waste. Residues of DISANO, on the other hand, can simply be disposed of in the bin for private residual waste.

## Cold flow

With vinyl floors, furniture and chair legs, for example, leave permanent dents in the surface (cold flow). With the pressure-resistant DISANO Floor, these dents never occur.

# Soft, warm to the touch, easy to clean, durable and quiet

100% free from PVC and plasticisers

Its many positive properties make DISANO particularly pleasant in everyday use. Thanks to the high quality of the materials and the excellent workmanship, our floors stay as beautiful as on the very first day – even after years of use. This makes it possible to reduce the consumption of resources for new production and the disposal of obsolete building materials to a minimum. Sustainability at its best.

**Warm to the touch for a comfortably warm and cosy ambience in the home.**

Thanks to the use of carefully selected, healthy materials.

**Very hard-wearing – it convinces with its exceptional durability**

Even when exposed to intense wear and tear, for example in entry areas or when used in commercial applications.

**Suitable for use in damp rooms – thanks to moisture protection or full waterproof properties**

DISANO ClassicAqua, LifeAqua, SmartAqua and WaveAqua are suitable for damp rooms, and DISANO Saphir and Project are even waterproof

**Soft step – the SilentSense surface is warm and comfortable underfoot.**

DISANO is pleasantly durable, and the SilentSense surface protects the floor from dents and moisture.

# Comfort throughout the home

DISANO Design Floors are ideal for all rooms. Whether it is surface aesthetics, installation height, maximum weight capacity or the application area – with five different series, DISANO meets all needs.

## DISANO ClassicAqua – The Elegant One

Price

Renovation-friendly  
installation height of 2.0 mm (3/32")

# A waterproof solution

HARO Design Floors are suitable for any room – The waterproof lines made of solid plastic can even be placed in water. The DISANO variants with moisture protection are also resistant to standing tap water for 24 hours – then the water must be removed.

## Waterproof

### **DISANO Saphir** **DISANO Project**

- Approved for installation in bathrooms, kitchens and other damp rooms
- Extremely hard-wearing thanks to the waterproof full-plastic construction (DISANO Saphir with rigid core board, DISANO Project with ElastoTec layer)

## With moisture protection

### **DISANO ClassicAqua** **DISANO SmartAqua** **DISANO LifeAqua** **DISANO WaveAqua**

- Reliable moisture protection thanks to AquaReject coreboard
- With glue-down installation, it is also suitable for bathrooms

# Easy to clean and maintain

DISANO Design Floors are extremely easy to care for and remain timelessly beautiful. Dry cleaning with a vacuum cleaner or a broom is all that is necessary. Simply sweep or vacuum the floor and, if necessary, wipe the floor with a damp cloth using the environmentally friendly 'clean & green active' series for cleaning and care, which is specifically designed for design floors.

313 mm  
(12 5/16")

63 mm (2 4 27/32")

**1**

The SilentSense surface with its authentic wood or stone look is elastic, durable and comfortably warm, protects the floor, provides it with durability and is easy to clean. The decorative layer gives the product an authentic wood or stone look.

**2**

The waterproof ElastoTec layer is particularly resistant to shock and impact. Not only does it protect the floor from moisture, it also optimises the stability of the boards and ensures a pleasant, elastic walking feeling thanks to the composition of the materials.

**3**

The PVC-free, dimensionally stable AquaReject coreboard is a rigid coreboard based on natural materials. This makes even slight irregularities in the subfloor invisible. As it has the highest degree of resistance against swelling, it is also approved for use in rooms exposed to splashes and spills, (Wo-I in accordance with DIN 18534), such as domestic bathrooms. Due to its special impregnation, the coreboard can withstand standing tap water for up to 24 hours.

**4**

Thanks to the special composition of materials, the HydroResist barrier offers additional safety and reliability, and protects the aquaReject coreboard against moisture from below.

**5**

High-density cork insulation layer that optimises walking comfort and reduces room and footfall sound. No additional insulation underlay required.

# DISANO SmartAqua Technology and range

**1**

The SilentSense surface with its authentic wood or stone look is elastic, durable, comfortably warm, protects the floor, provides it with durability and is easy to clean. The decorative layer gives the product an authentic wood or stone look.

**2**

The PVC-free, dimensionally stable AquaReject coreboard is a rigid coreboard based on natural materials. This makes even slight irregularities in the subfloor invisible. As it has the highest degree of resistance against swelling, it is also approved for use in rooms exposed to splashes and spills, (Wo-I in accordance with DIN 18534), such as domestic bathrooms. Due to its special impregnation, the coreboard can withstand standing tap water for up to 24 hours.

**3**

Thanks to the special composition of materials, the HydroResist barrier offers additional safety and reliability, and protects the aquaReject coreboard against moisture from below.

**4**

The high-density cork insulation layer that absorbs room and impact sound ensures optimised walking comfort. No additional insulation underlay required.

# DISANO Saphir

**For the highest standards,  
even in the commercial sector.**

Whether for commercial or private use: DISANO Saphir is the extremely hard-wearing design floor for all requirements. It is 100% waterproof and has a construction height of just 4.5 mm. This makes it the perfect choice for all places and situations where the beauty and elegance of the floor has to withstand exceptional strain.

## DISANO Saphir – The Allrounder

- Extremely hard-wearing and durable thanks to the waterproof full-plastic coreboard
- Waterproof, suitable for installation in the bathroom
- Authentic wood styles with micro bevel on 4 sides
- Resistant to fading under UV light and dimensionally stable
- Pressure-resistant even with heavy furniture
- Very suitable for use with underfloor heating/cooling
- Especially suitable for renovations and remodelling thanks to its low profile height of 4.5 mm (3/16")
- Easy to install thanks to the Top Connect installation system
- Glue-down installation possible
- Plank XL 4V for a spacious room ambience
- Natural stone styles in tile format

# DISANO Saphir Technology and range

**1**

The SilentSense surface with its authentic wood or stone look is elastic, durable and comfortably warm, protects the floor, provides it with durability and is easy to clean. The decorative layer gives the product an authentic wood or stone look.

**2**

The dimensionally stable full-plastic coreboard is a rigid coreboard that is free from PVC and plasticisers. This makes even slight irregularities in the subfloor invisible. This means that DISANO Saphir is extremely hard-wearing and completely water-resistant – even with standing water. In addition, the special material composition of the coreboard ensures high elasticity and thus a pleasantly soft feeling.

### Silent Grip insulation underlay

High-quality sound insulation underlay, with natural mineral fillers and with an anti-slip grip surface. Specially designed for the floating installation of DISANO Saphir. Also suitable for installation over underfloor heating or cooling

# DISANO Project

## Setting the standard in all areas.

With its special structure, the waterproof DISANO Project guarantees a high degree of durability. Its construction height of 2 mm makes it the perfect floor for renovations, while the fire protection class Bfl-s1 provides additional safety.

### DISANO Project – The Professional One

- Authentic wood and stone reproductions with micro bevels on 4 sides
- Waterproof
- Especially suitable for renovations and remodelling thanks to its low profile of just 2 mm (3/32")
- Highly suitable for use with underfloor heating
- High stability through the special layer construction
- Glue-down installation by a professional installer
- Fire protection classification Bfl-S1 (hardly inflammable)

# HARO Accessories

**Always a perfect match.**

HARO naturally offers the matching accessories for your design floor. Manufactured in the same quality and perfectly matching the look and characteristics of our floors – for a better feeling when you restyle your home. From skirtings to insulation underlays: we offer a wide range of accessories for every requirement from a single source.

Compatible  
with  
all products

DISANO Saphir  
Plank 1-Strip 4VM  
Crystal Oak textured  
(wood reproduction)

Find the right accessories for your floor online!

## Guaranteed to fit: HARO Accessories

When you select HARO, you get more than just a floor. For HARO offers perfectly harmonised accessories, cleaning and care products, and replacement parts – not just for today and tomorrow, but for the entire lifetime of your floor. After all, as a fifth-generation family business, we are well aware of the importance of continuity and reliability – for the availability of our products as well as the relationship with our valued dealers and installation partners.

### Skirtings

Matching or with a contrast? Skirtings enable transitions between the floor and the wall that are visually and functionally attuned to your desired floor. Naturally, they are also available in water-resistant versions.

### Insulation underlays

Whether with or without underfloor heating: different insulation underlays guarantee the perfect underlay for every room and every floor.

blauer-engel.de/uz276  
blauer-engel.de/uz210

### Transition moulding

With the matching transition mouldings, you can harmoniously combine different flooring variants or even different floor coverings. Thanks to their design, the transition mouldings can also balance out different height levels.

*You can get the right care product for your floor from your dealer or online.*

## clean & green, perfect care for design floors

We always offer the perfect cleaning product so that you can keep your floor clean easily and gently. You will be amazed at how little of the care product you need.

### **clean & green active**

For the basic cleaning of worn surfaces in intensively used living areas. For cleaning the floor before treatment with aqua shield.

### **clean & green natural**

For easy, effective cleaning and care of living areas with a normal amount of wear and tear.

### **clean & green aqua shield**

For the lasting refurbishment and care of your DISANO or cork floor.

# DISANO will convince you. Guaranteed.

Every single day, our employees put their expertise, experience and passion into their work.

We are therefore convinced that only products of superior quality leave our company premises. We underline our conviction with our warranties of 20 and 25 years, which is up to twice as long as those of other manufacturers.

The fact that the quality behind the scenes is as excellent as the products themselves is proven by the numerous certificates awarded by internationally recognised institutions. And as a member of important industry organisations and associations, we are also committed to quality, transparency and sustainability that reach beyond our company.

## HARO warranty (up to 25 years)

In addition to the statutory warranty terms, HARO also provides additional warranties for various product groups. Please note the respective warranty conditions.

## Made in Germany

Our quality floors are of the highest-quality German workmanship.

## ISO Certificates

HARO's energy management is certified according to ISO 50001: 2013.

DIN EN ISO 14001: 2004 stands for active environmental management. We have been a holder of the Bavarian Quality Award since 1998, and of the PEFC seal since 2002.

Since 1995, we have been certified according to DIN EN ISO 9001:2008. This ensures consistent product quality.

## CE Certificate

The CE label stands for compliance with all European safety and health directives.

## Certificates

[blauer-engel.de/uz176](http://blauer-engel.de/uz176)  
[blauer-engel.de/uz120](http://blauer-engel.de/uz120)

The Blue Angel certifies the environmental compatibility of our products.  
[blauer-engel.de/uz176](http://blauer-engel.de/uz176) // [blauer-engel.de/uz120](http://blauer-engel.de/uz120)

With its certification, the UL ECO INSTITUT proves that DISANO by HARO meets the strictest regulations concerning the emission of harmful substances.

The French VOC label certifies that the emissions of DISANO Design Floors by HARO are completely non-hazardous.
