

A photograph of two penguin figurines on a light-colored wood-grain laminate floor. The larger penguin is on the left, and the smaller one is on the right. Both have black heads and backs with light-colored bodies. The floor has a realistic wood grain pattern and a slight sheen. The HARO logo is in the top center, and the text 'Laminate Floor' is in a yellow box at the bottom right of the image area.

**Millions of people
walk on HARO
Floors every day.
Find out why!**

Wood has been our passion since 1866.

We have been working with wood for over 150 years. As Germany's leading flooring manufacturer, we produce naturally beautiful floors with passion and care. With our special expertise in the area of wood, we bring the best of two worlds together in our Laminate Floors: natural styles that are almost indistinguishable from wood and a technical construction that makes the floors particularly hard-wearing and especially easy to clean and maintain. Even in the 5th generation, we take our responsibility as a family company seriously and are committed to society, the environment, and people – with respect and appreciation.

Appreciated worldwide. Made in Germany.

To ensure that you enjoy your HARO Floor for many years to come, we process and finish only the highest quality materials. Our floors have proven their worth millions of times and are installed all over the world. But they are not made just anywhere – they are made here in Rosenheim. Investing in a high-quality HARO Floor provides long-term value and benefits.

Quality for the highest standards.

Do you know what makes HARO Laminate Floors so special?

It is the fact that behind the natural appearance of the styles in the look of oak, maple and other quality woods, there are also convincing inner values: wood as the main component makes our Laminate Floors a sustainable, healthy choice for all living areas. The elaborate construction ensures durability and robustness.

The insulation underlay creates a 'forest floor' effect and reduces indoor sound. Quality you can hear and feel.

We learn from the best: Nature.

The moment you see and touch a HARO Floor, you immediately feel the natural beauty. Naturally, the same holds true for our Laminate Floors. Our inspiration for this is always nature – the changing light and colours, the shapes and textures. Natural beauty feels right in every room, every single day. Simply perfect.

For us, sustainability is more than just a word.

Wood is HARO's most important raw material. It is an essential component of our floors, and our decades of expertise in wood also ensure exceptionally natural surfaces for our laminate floors. The regrowth of wood depends on a healthy environment. We take our environmental responsibilities seriously, with a focus on long-term thinking and carefully considered action. Naturally, this includes the careful use of all resources, and the potential for our products to be recycled.

Perfect throughout the home

HARO Laminate Floors are ideal for all rooms. Whether it is surface aesthetics, installation height, maximum weight capacity or the application area – with four different series, we meet all needs.

TRITTY 200 Aqua – The Hard-wearing One

Thanks to the high level of use and its excellent resistance to abrasion, this floor is ideally suited for more heavily used living areas such as hallways and kitchens, and even for commercial applications. The extra moisture protection also makes TRITTY 200 Aqua the right choice for the bathroom.

Level of use 23/33

TRITTY 100 The Tough One

For residential applications with high traffic and commercial applications with medium traffic

Level of use 23/32

TRITTY 90 The Trendy One

For residential applications with high traffic and commercial applications with medium traffic

Level of use 23/32

A waterproof solution

HARO Laminate Floors are suitable for any room – even if it gets damp. Thanks to the aquaTec system, you can rest assured that they will always stay in shape. Additional safety is provided by the new TRITTY 200 Aqua Series, which is even resistant to standing tap water for up to 24 hours.

aquaTec – double moisture protection

Their well-balanced multilayer construction ensures that HARO Laminate Floors remain stable at all times. And they will always stay in good shape. This is ensured by the special aquaTec system, which combines the moisture-control aquaResist HDF coreboard with a specially impregnated surface protection layer (overlay and decorative layer).

TRITTY 200 Aqua – even better moisture protection

With the aquaReject moisture-control coreboard, TRITTY 200 Aqua is optimally protected against moisture and is also approved for installation in damp rooms (Wo-1 in accordance with DIN 18534), such as domestic bathrooms or kitchens. Due to its special impregnation and the highest degree of resistance against swelling, TRITTY 200 Aqua can withstand standing tap water for up to 24 hours. Moisture test based on test method ISO/DIS 4760:2021.

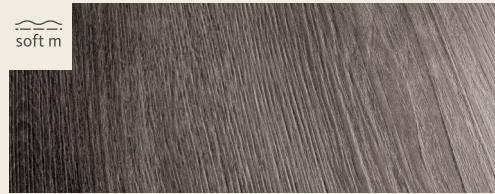

Surfaces that stand out

The surface treatment protects and refines the laminate floor. To give the individual appearance of each board its final touch, HARO's designers first choose the style. Only then do they decide which type of finish best suits the look of the floorboard.

Textured matt

Similar to real wood grain. The matt appearance underlines the natural look.

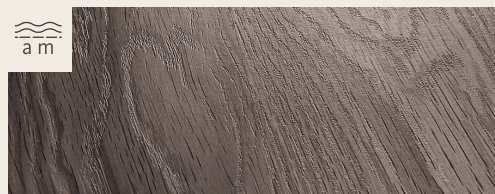

Soft matt

Noticeably velvety-soft and naturally matt with a slight gloss effect in the texture.

Authentic

The texture and style are virtually indistinguishable from real wood. The gloss level emphasises the character and natural look of the wood reproduction.

Authentic matt

The texture and style are virtually indistinguishable from real wood. The surface has a natural oil character and Plank 1-Strip also has a slight gloss effect in the pores.

Authentic soft

The texture and style are virtually indistinguishable from real wood. The surface feels velvety and soft.

Bevelled edges on the long and short sides

To create an even more vivid impression, the edges on the long sides and ends are bevelled.

TRITTY 200 Aqua

The hard-wearing laminate floor with extra moisture protection

- Suitable for damp rooms
- Double moisture protection due to aquaTec system
- With the level of use 33, the highest abrasion class AC 6 and a thickness of 8 mm, it is particularly hard-wearing and abrasion-resistant
- Incredibly fast and easy to install thanks to TopConnect
- Available with Silent Pro (luxury insulation underlay) or Silent CT (the world's quietest laminate floor)
- Suitable for use with underfloor heating and cooling

TRITTY 200 Aqua Technology and range

1

The overlay, the top layer, is specially impregnated and therefore almost as hard as diamond and is hard to beat when it comes to durability, scratch resistance and strength.

2

The decorative layer is made from a special lightfast paper that is elaborately printed and impregnated with melamine resin to ensure a high degree of naturalness and bright, brilliant colours. The decorative laminate and kraft paper are specially impregnated.

3

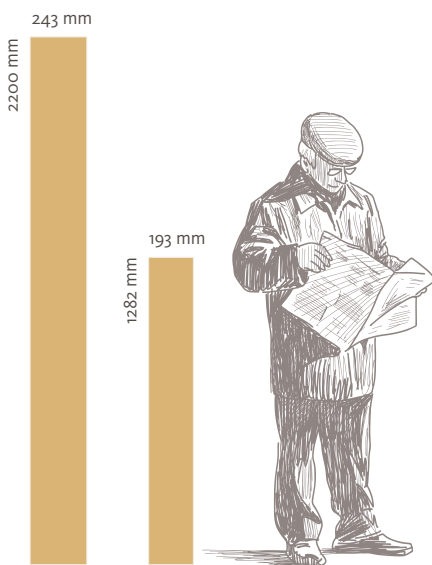

The dimensionally stable AquaReject coreboard is also approved for use in damp rooms in accordance with WO-1 (DIN 18534), such as domestic bathrooms or kitchens, due to the highest possible swelling resistance.

4

The multi-layer, moisture-repellent balancing laminate on the back of the floorboard balances out the tension to the overlay. It prevents the boards from warping and offers additional moisture protection.

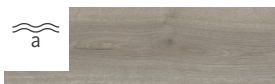

5

Optionally available with integrated Silent Pro luxury insulation layer or with Silent CT technology (suitable for use with underfloor heating)

You can find detailed installation instructions on HARO.com

Top Connect – the easiest method of installation

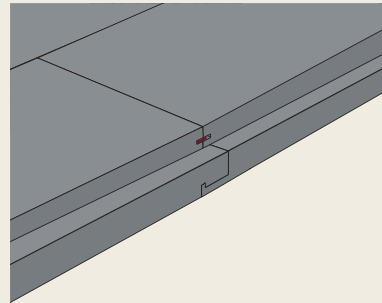

Thanks to the innovative Top Connect installation system, you can easily and quickly install our laminate floors yourself – and remove them just as easily when you move home. No tools are necessary. Simply angle in the floorboard, push it against the previously laid board and press it down. Done! Installation is quick and your floor will be dimensionally stable and fit precisely. It can also be installed on underfloor heating and cooling systems. We always have the matching accessories for your HARO Laminate Floor. You can find out more about insulation underlays, skirtings and mouldings on page 52.

Incredibly quiet

With HARO TRITTY Silent CT, we have invented the world's quietest laminate floor – indoor sound is reduced by 60% compared to conventional laminate floors. True living comfort! This makes HARO TRITTY Silent CT the perfect choice for rooms that are used intensively for living and playing, such as living rooms or children's rooms. The Silent CT technology is available for all TRITTY series, except for the NKL 31 special edition.

Easy to clean and maintain

HARO Laminate Floors are extremely easy to care for and remain timelessly beautiful. Dry cleaning with a vacuum cleaner or a broom is all that is necessary. Simply sweep or vacuum the floor and, if necessary, wipe the floor with a damp cloth using the eco-friendly cleaning agent 'clean & green active', which is specifically designed for HARO Laminate Floors.

60% quieter than standard laminate floors

Guaranteed to fit: HARO Accessories

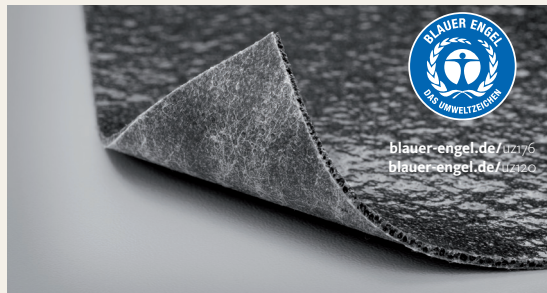

When you select HARO, you get more than just a floor. For HARO offers perfectly harmonised accessories, cleaning and care products, and replacement parts – not just for today and tomorrow, but for the entire lifetime of your floor. After all, as a fifth-generation family business, we are well aware of the importance of continuity and reliability – for the availability of our products as well as the relationship with our valued dealers and installation partners.

We always offer the right cleaning product so that you can keep your floor clean easily and gently. You will be amazed at how little of the care product you need.

Skirtings

Matching or contrasting? Skirtings enable transitions between the floor and the wall that are visually and functionally attuned to your desired floor. Naturally, they are also available in water-resistant versions.

Insulation underlays

Whether with or without underfloor heating: different insulation underlays guarantee the perfect underlay for every room and every floor.

Transition mouldings

With the matching transition mouldings, you can harmoniously combine different flooring variants or even different floor coverings. Thanks to their design, the transition mouldings can also balance out different height levels.

Stair nosings

With stair nosings, the room and staircase become an aesthetic unit. This lends a particularly elegant and harmonious feel to open room concepts.

HARO Laminate Floors will convince you. Guaranteed.

Every day, our employees put great expertise, experience and passion into their work. That is why we are certain that HARO's products will convince you with their outstanding quality. We emphasise this by offering warranties of 20 and 25 years, which is up to twice as long as those of other manufacturers. The fact that quality is a top priority at HARO is proven by numerous certificates from internationally recognised institutions. As a member of important industry organisations and associations, we are also committed to quality, transparency and sustainability that reach beyond our company.

Made in Germany

Our quality floors are of the highest-quality German workmanship.

Certificates

The Blue Angel certifies the environmental compatibility of our products: blauer-engel.de/uz176, blauer-engel.de/uz120

ISO Certificates

HARO's energy management is certified according to ISO 50001: 2013.

DIN EN ISO 14001: 2004 stands for active environmental management. We have been a holder of the Bavarian Quality Award since 1998, and of the PEFC seal since 2002.

Since 1995, we have been certified according to DIN EN ISO 9001:2008. This ensures consistent product quality.

CE Certificate

The CE label stands for compliance with all European safety and health directives.

HARO

Nature's ally

HARO processes and refines only high-quality, natural materials.

Tested and certified

HARO Floors are proven to create a healthy living environment and have been tried and tested millions of times.

Manufactured in Germany

HARO Floors are manufactured exclusively in Germany and installed worldwide.

Over 150 years of experience

For five generations, HARO has stood for finest craftsmanship, high quality and responsibility
